

## RARE DISEASE DAY

(Mr. DOLD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOLD. Mr. Speaker, yesterday was Rare Disease Day, Leap Year, and researchers around the world have identified more than 6,000 rare diseases, half of which impact children.

Last year, the House took a major step toward advancing rare disease research. I was proud not only to cosponsor, but to help pass 21st Century Cures. 21st Century Cures is a bill designed to help the world's best scientists find cures for the most deadly diseases that we face.

But it is not just the researchers, it is folks like Pat Livney, who is a friend and an advocate working to help cure Charcot-Marie-Tooth disorder, and folks like Jeff Aronin and his team working to solve Duchenne's disease.

Mr. Speaker, every day, scientists across the country are using NIH grants to discover the causes, the symptoms, the treatments, and ultimately search for the cures for rare diseases.

In honor of Rare Disease Day, I encourage my colleagues to join me in calling for more funding for the NIH this year and every year so that NIH can cure many of these diseases and ultimately save lives.

And that is just the way it is.

## WOMEN'S HISTORY MONTH

(Ms. HAHN asked and was given permission to address the House for 1 minute.)

Ms. HAHN. Mr. Speaker, I rise to recognize Women's History Month and the bold women pioneers who shattered glass ceilings and paved the way for women across this country to succeed.

From the courageous women at the 1848 Seneca Falls Convention who came up with the audacious new idea of women's rights, to the suffragettes who won the right to vote in 1920, we stand on the shoulders of the giants that came before us.

But women's history does not end there. From the first woman Speaker of the House, NANCY PELOSI, to the three women on the Supreme Court, to women candidates for President, bold women continue to break barriers.

But there is work to be done. Women are still paid less for the same work as their male counterparts. We are more than half the population, but just 20 percent of Congress. The United States continues to be one of just three nations in the world with no paid maternity leave law.

I know my daughter and my granddaughters deserve the same opportunities as my sons and grandsons. I am going to fight on behalf of the women across this country until that is a reality.

## HONORING OUR FALLEN POLICE OFFICERS

(Mr. POE of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. POE of Texas. Mr. Speaker, Ashley Guindon was 28 years old when she reported for duty after being sworn in to the Prince William County Police Department the day before.

On her first call, she responded to a domestic violence disturbance. She and her fellow officers rushed to the scene and, upon arrival, multiple gunshots came from the house.

Officer Guindon was shot and murdered. Yet another one of America's finest killed in the line of duty. Here she is, a photograph of her, taken the day she was sworn in. The next day, she was murdered.

Officers David McKeown, 33, and Jesse Hempen, 31, were also shot, but did survive.

Inside the house, the shooter's wife had also been murdered by the outlaw.

Before having her life coldly ripped from her, Guindon served in United States Marine Corps for 6 years.

Officers who answer and respond to domestic violence calls respond to some of the most dangerous situations in America. Those who wear the badge protect the rest of us from the evil that lives among us.

In the first 2 months of 2016, 14 police officers have been killed in the United States.

Mr. Speaker, as her body was transported, over a hundred of Guindon's fellow officers somberly lined the streets to pay tribute to one of their own. Death is the harsh reality that these remarkable men and women face every day.

Officer Guindon risked her life responding to a domestic violence call. Her life was stolen from her while on duty, her 1 day of service and career as a police officer.

Officers like her are a cut above the rest of us, Mr. Speaker. They are a rare and remarkable breed of Americans.

And that is just the way it is.

## WOMEN'S HISTORY MONTH

(Ms. CASTOR of Florida asked and was given permission to address the House for 1 minute.)

Ms. CASTOR of Florida. Mr. Speaker, I rise to join the millions of Americans who will mark the annual celebration of March as Women's History Month.

During Women's History Month, we celebrate the successes of America's women throughout our history and the sacrifice of the bold women who broke down so many barriers.

This year I would like to devote Women's History Month to saluting our female veterans and military members who work to keep us safe.

And even though the Department of Defense 3 months ago announced that females will now be able to serve in

military combat roles, women actually have been serving in combat since the Civil War; like Army Specialist Brittan Gordon of St. Petersburg, Florida, who was the first woman from the Tampa Bay area killed in action in Iraq and Afghanistan in 2012 at the young age of 24.

And like the many women who serve at MacDill Air Force Base in Tampa, whether it is at Air Mobility Command, Special Operations Command or Central Command, you women are making history, and you are doing so while you are working to keep us safe.

We are grateful for your service to this country during Women's History Month and every year.

## CLIMATE CHANGE

(Mr. BENISHEK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENISHEK. Mr. Speaker, as a lifelong resident of Northern Michigan, I know how important it is to protect and conserve our precious natural resources. Northern Michigan's economy depends on our Great Lakes and outdoor spaces for tourism, agriculture, and sporting activities.

Generations of people in my district have grown up experiencing the outdoors, from the shores of Sleeping Bear Dunes National Lakeshore, to Isle Royale National Park.

However, we need to make sure that there is a balance and that we do not undertake rash and unproven regulatory policies that are almost guaranteed to negatively impact our economy in the hope of some potential, and often unquantifiable, environmental gain.

All too often, the consequence of overly burdensome regulations here in America is the flight of manufacturing and industry to nations such as China and India. Mr. Speaker, these nations simply do not have the same level of protections or respect for the environment that we have here in America.

I fail to see how this benefits our planet's environment. I know that far too often the result is American citizens losing their jobs.

I hope we can join together to find commonsense and bipartisan ways to continue to protect our environment.

## DELTA SIGMA THETA SORORITY, INC.

(Mrs. BEATTY asked and was given permission to address the House for 1 minute.)

Mrs. BEATTY. Mr. Speaker, I rise today to recognize Delta Sigma Theta Sorority, Inc., established January 13, 1913, by 22 collegiate women at Howard University.

From those humble beginnings 103 years ago, to today, there are more than 200,000 Deltas and 1,000 college and alumni chapters worldwide.

Mr. Speaker, today is the first day of Women's History Month. Thousands of
